

Week 06 Journal

Name: Zunaid Ebne Hie

Student ID: 12221209

Task 2 – Create Web Pages in OpenWRT

Created index.html, student HTML page, and CSS file.

Task 3 – Capture HTTP Packets

Packet capture file: http-12221209.pcap

ARP table shows reachable devices and their MAC addresses.

Task 4 – Analyse HTTP Packet Capture

The browser requested webpages using HTTP/1.1 over TCP.

Clicking the date and time button did not send another request because JavaScript executed locally.

HTTP Request Packet Diagram

Ethernet Header	IP Header	TCP Header	HTTP Request
14 Bytes	20 Bytes	20 Bytes	GET /12221209.html
Src MAC	Src IP:	Src Port	HTTP/1.1
Dest MAC	192.168.56.1	49500	Host: 192.168.56.2
	Dest IP:	Dest Port	
	192.168.56.2	80	

Total packet contains Ethernet + IP + TCP + HTTP request data.

Task 5 – Cookies

Cookies may store session IDs, browser preferences, login information, and analytics data.
